

## Cheshire West and Chester Locality Dashboard Chester Locality

The dashboard provides a high level indication of how the locality compares to Cheshire West and Chester as a whole and also how it compares to England. The comparison on the dashboard page is very crude, it is simply a statement of 'higher' or 'lower' with no statistical significance included. Where appropriate, the use of colour and a tick or cross provides some context of whether the locality is better or worse in comparison. The profiles provide supporting detail for each indicator on the dashboard.

### Demographics

	Chester	Cheshire West and Chester	Locality compared to borough	England	Locality compared to England
<b>Fertility (2013 - Live Birth Rate) <sup>4</sup></b>	53.8	58.9	Lower	62.4	Lower
